## Sani-Seat

### Restroom Toilet Seat Sanitiser

#### Product Description

SANI-SEAT is a dual-active toilet seat sanitiser formulated with both quaternary ammonium compounds and alcohol to deliver rapid and reliable disinfection. Designed for convenient spray-on application, this fast-drying formula provides a safe, effective, and hygienic method for sanitising toilet seats and other high-touch restroom surfaces.

Suitable for use in spray dispensers, SANI-SEAT is compatible with ceramics, plastics, painted surfaces, and most non-porous restroom materials.

When diluted at 1:10 in accordance with the quaternary ammonium compound manufacturer guidelines, SANI-SEAT satisfies TGA Option C requirements for use as a Commercial Grade Disinfectant. Its no-rinse formulation makes it ideal for public washrooms and high-traffic facilities where consistent hygiene standards are essential.

#### Product Benefits

- Dual Active Formula – Combines quaternary ammonium disinfectant and alcohol for fast, effective sanitation.
- No-Rinse Sanitiser – Safe for direct use on toilet seats and high-touch surfaces without the need for rinsing.
- Quick Drying – Evaporates rapidly, leaving surfaces clean and streak-free.
- Versatile Use – Suitable for spray dispensers and can also be used as a spray-and-wipe sanitiser on all non-porous surfaces.
- Dilutable – May be diluted up to 10:1 for general surface sanitising, offering flexibility across a range of applications.
- Hygiene Assurance – Meets TGA Option C criteria for Commercial Grade Disinfection when used as directed.
- Compatible with Common Restroom Materials – Safe on ceramics, plastics, painted surfaces, and most fixtures.

#### Application

- Use SANI-SEAT as supplied for toilet seat sanitising in public washrooms, commercial buildings, hospitality venues, schools, offices, and transport facilities.
- Apply via spray dispenser directly onto the toilet seat or high-touch surface. Allow to dry completely before use no rinsing required.
- For general spray-and-wipe surface sanitising on non-porous materials, dilute up to 10:1 with clean water. Apply evenly, wipe if needed, and allow to dry.
- Ensure surfaces are free from heavy soil before applying sanitiser for best results.
