

The Future of Jet Nozzles is Here

Castle has partnered with FDX Fluid Dynamix to Bring Cutting Edge German Oscillating Nozzles to Australia and New Zealand.

Oscijet's patented world-first nozzle technology brings improved cleaning and rinsing results to food processing sites.

Oscijet's advanced fluidic design delivers a powerful sweeping spray that effectively removes a wide range of soils across a variety of food process cleaning applications. Engineered for easy retrofit installation, it fits most cleaning and rinsing equipment and is also suited to CIP applications. The result is up to 10x better cleaning performance, improved rinsing times, and reduced water usage.

Why Upgrade to Oscijet?

German-Engineered Precision

Unmatched quality for consistent, high-performance cleaning results.

Zero-Moving-Part Design

Turbo-like cleaning without wear or maintenance needs.

Seamless FPE Integration

Direct retrofit into existing Food Processing Equipment.

3-Year Manufacturer Warranty[#]

Peace of mind with years of guaranteed protection.

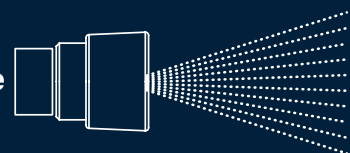

#Terms & Conditions apply

Revolutionary Rapid Sweeping Spray Pattern Increases Cleaning Efficiency.

Oscijet Nozzle

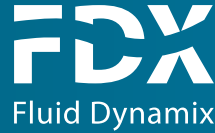

Standard Nozzle
